

Sacramento Metropolitan Fire District

Annual Report 2005

SACRAMENTO METROPOLITAN FIRE DISTRICT

Mission Statement

**To provide levels of excellence
in emergency, prevention, education, and
community services to minimize loss of life and
property damage due to fire, medical, and other
emergencies in an efficient, professional, and
fiscally responsible manner.**

SACRAMENTO METROPOLITAN FIRE DISTRICT

Enduring Goals

1. Ensure that the public served by the District continues to receive the best quality fire protection, fire prevention, fire safety education, emergency medical services, and other emergency response services.
2. Ensure that the Board of Directors' management of District activities is accomplished in an open environment to promote responsiveness to public concerns and encourage participation by members of the public.
3. Foster productive community relationships with community entities and the public.
4. Provide appropriate and timely fiscal oversight to District operations.
5. Ensure that the District has a fully qualified management team capable of addressing future challenges and opportunities, and that District employees are fully qualified, well trained, properly equipped, and appropriately motivated to perform their duties.
6. Foster a productive working relationship with District management staff and promote a positive relationship with employee labor organizations.

Chief Donald Mette

MESSAGE FROM THE CHIEF

I am honored to present the 2005/2006 year end report dealing with the various activities of the Sacramento Metropolitan Fire District. As you view this report, you will notice that the men and women of Metro Fire have gone above and beyond to contribute to this organization.

This report contains a year in review complete with statistics of our emergency activities. Also included are the accomplishments of all divisions including Operations, Finance, Human Resources and Support Services.

We continue to seek community feedback on the quality of our service, and the speed, professionalism and compassion with which it is provided. In 2005/2006, we

continued to receive an "A" customer service rating. Many of our members have been individually recognized for touching the lives of community members. Delivering timely, professional and caring service to the citizens of the community we serve is our goal. We are pleased with our customer feedback and strive each day to improve in every facet of our service.

There is much to look forward to in 2006-2007. The continuation and improvements of current programs coupled with the opening of the new Fire Stations for 32 and 110, and the eagerness and enthusiasm of many new firefighters, promises an exciting year.

Your Fire District is ready and willing to meet the challenges to serve this community. We are committed to serve with highly trained personnel and equipment to meet the mission statement of the Sacramento Metropolitan Fire District.

I would like to thank the many Metro staff members who contributed to the completion of the 2005-2006 Annual Report. Their Knowledge, time and energy in the production of this report, which provides a complete overview of the Sacramento Metropolitan Fire District's many activities and achievements during this time period, is significant and very much appreciated. The District is very appreciative of Public Education Technician Jill Conner's role in the gathering of information and the formatting of the report.

BOARD ACCOMPLISHMENTS FOR 2005

- **New Ethical Standards for the Board.** We established a policy requiring a two-year separation between serving as an active member of the fire board and becoming a District employee. This standard applies to all board members and hopefully sets a new benchmark for elected officials. The entire board also attended harassment training provided by staff. This is the first time to my knowledge that line supervisors, management and the Board have collectively attended any training of this type.
- **Ground Breaking on Two Fire Stations.** These are the first new fire stations in ten plus years and we purchased land for one more station during the course of the year. With Fire Chief Mette at the helm, we also developed a new concept to install temporary facilities which can be relocated once a new station is built allowing us to serve growing communities more quickly and efficiently than traditional methods have allowed in the past.
- **Bringing the Board Clerk Under the Purview of the Fire Board.** This established a direct line of communications and accountability for the Executive Committee and the Board Clerk. This aligns our organization with other more progressive governmental bodies.
- **Selection of the First New Fire Chief.** The Board was noticed abruptly in June 2005 that the Fire Chief had decided to retire in four months. We developed a clarified job description, brought in a consultant and did two rounds of interviews in closed session without involving a great deal of staff time. We selected an outstanding member of our own organization who has proven to be an excellent leader.
- **Selection of General Counsel.** The Board made some tough decisions as to the qualifications and the direction that the District needed to take as far as legal services. We decided to stay with General Counsel rather than go back to an outside law firm for our day-to-day legal advice. We selected and brought on board an outstanding individual who is not only respected in the legal community but who has a stellar reputation with law enforcement and the local community. This process involved the Board reviewing ten applications and interviewing the top three candidates available.
- **Re-established Positive Management-Labor Relations.** Most of the credit for this goes to our new Fire Chief, Don Mette, but the Board accepted his plan for committees and the implementation of a transition team to make the change from one administration to another.
- **Adding New Depth of Coverage.** At the new Fire Chief's recommendation we added staff to the truck companies and improved service to our communities.
- **Created an Economic Development Core group.** Worked with staff to identify challenges and opportunities. The new Fire Chief is spearheading the work.
- **Re-established Relationships with the Cities.** The Board attended City Council meetings with the Fire Chief to show our support and commitment to his vision. We recommitted to joint participation in the 2 X 2 committees with our city partners.

Message from 2005 Board President

SACRAMENTO METROPOLITAN FIRE DISTRICT

2005

DIVISIONS

SACRAMENTO METROPOLITAN FIRE DISTRICT

ADMINISTRATION BUILDING

2101 Hurley Way
Sacramento, California 95825
916/566-4000

www.smfd.ca.gov

ADMINISTRATION

2101 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4000

The Administration Division handles the business side of the organization. The staff's main responsibilities include Risk Management, the District's Self-Insured Workers' Compensation Program, Records Management, Inter-Governmental Liaison, Legislative Analysis, Policies and Procedures, Strategic Planning and Cost Recovery.

Managing the Self-Insured Workers' Compensation Program consists of filing and coordinating claims, collection and distribution of OSHA injury statistical information, and representing the District at hearings before the Workers' Compensation Appeals Board. As a result of staff's direct control in managing Workers' Compensation claims, the District's expenses are less than one-third of those for neighboring jurisdictions.

In serving as the District's inter-governmental liaison with other agencies such as LAFCo (Local Agency Formation Commission), staff evaluates the potential for District growth and expansion, drafts correspondence, initiates LAFCo applications, writes consolidation reports, and represents the District before LAFCo on hearings related to governance issues.

As part of its Long Range Planning function, staff evaluates avenues for District revenue enhancements, including implementing a Special Fire Tax and a mitigation/impact fee for the acquisition of property and construction of new fire stations.

Administrative staff also:

- Reviews pending legislation and recommends District positions
- Drafts Policies for the operation of the District
- Maintains the electronic Policy and Procedure Manuals
- Analyzes State statutes and regulations to determine if the District is eligible for reimbursement of mandated legislative costs

Additionally, staff has had legislation introduced to amend retirement provisions, Workers' Compensation benefits and processes, and LAFCo procedures designed to enhance special district consolidations.

GENERAL COUNSEL DIVISION

2101 Hurley Way, Sacramento, CA 92825 916/566-4461

The District has employed a full-time General Counsel since October 2000. This position is appointed by the District's Board of Directors and works under the supervision of the Fire Chief. The Division also employs a full-time Legal Secretary.

The Office of the General Counsel provides a wide and varied spectrum of legal activities in the performance of its duties, as well as, maintains the District's legal files. The General Counsel attends Committee and Board Meetings providing legal advice and guidance. He works closely with the District staff to provide legal direction, draft legal documents and correspondence, review requests for proposals and draft contracts. Counsel oversees District related litigation and monitors the work of outside Counsel retained by the District.

In addition, the General Counsel provides responsive and timely services as follows:

- Provides legal advice, on behalf of the District, to designated personnel as determined by the Board of Directors
- Advises the Board and Staff of legislation and case law affecting the District
- Advises the District's Board regarding the handling of all on-going, pending or potential claims and litigation filed by or against the District
- Provides advice and assistance to the District's representatives on labor relations matters, reviews Memoranda of Understanding or other labor agreements
- Provides advice and assistance in the administration of the District's general liability risk management and insurance programs
- Provides conflict of interest assistance to the Board of Directors and staff, seeking advice from the Fair Political Practices Commission
- Represents the District at Administrative Hearings, attends depositions of District employees under job related subpoena, and reviews Board meeting agendas for statutory compliance
- Oversees background investigations for all District employees
- Performs all legal duties for the Joint Powers Authority, as requested

TECH SERVICES

2101 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4000

In Process or Completed Projects

- Cleanup and reconfigure computer room-In Process
- Internet access upgrade-In Process
- Configure Cisco CSA server and replace exchange server
- Configure new ISA and Websense server-In Process
- Increase server backup capacity-In Process
- Develop and deploy SMFD website and intranet website
- Create (3) three test server environments
- Cisco routers/switch upgrade and data throughput upgrade-In Process
- Purchase & install web server hardware & software to host WebStaff in-house-In Process
- Firehouse software upgrade-In Process (Aug.)
- Migrate accrual database from Bitech to Telestaff/Inforum Gold
- Inforum Gold Financial Software Upgrade (Feb & Oct)-Feb. done
- Fire station recabling Project-In Process
- New station IT implementation project-In Process
- Airops GPS project-COMPLETED
- ADT alarm project-Partial complete (other needs to go to BID)
- MDT wireless access point-In Process
- MDT mapping solution-In Process

Projects Planned for the Future

- Disaster recovery plans and procedures-Pushed out to 2007
- Reconfigure core network infrastructure-Pushed out to 2007
- Assist contractor with the deployment of a electronic record retention system-ON HOLD
- Develop new (security) "network" access control system to all offsite facilities and stations-ON HOLD
- Windows 2003 and XP client upgrade-Tested and Postponed

Communications Division:

- Continue with Opticom installations and upgrades to new and existing intersections
- Complete moving the MDT's to the next generation protocol RDLAP
- Develop migration plan to upgrade to 800Mhz digital. This project is in process and tied to the re-banding of existing radios away from Nextel frequency
- Complete 800Mhz fire station alerting reconfiguration. This project is in process and is being incorporated into the new station construction designs.

FINANCE DIVISION

2035 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4321

The Finance Division fulfills responsibilities that include the coordination of the development and planning process for budget formulation and ensures compliance after budget adoption in accordance with district policies, applicable laws and statutes, and operating procedures. The Finance Division also creates projections of revenues, expenditures, and provides ongoing financial analysis, develops financial policies and related reports, maintains financial records, and ensures the ongoing maintenance of the payroll, benefits, accounts payable, and accounts receivable functions.

The Finance Division is headed by the Director of Finance and consists of fourteen employees including the Director of Finance. Listed below are the principal functions performed and the number of employees assigned to each area:

Director of Finance: The Director of Finance is assigned the activities and operations of the Finance Division and assists the Fire Chief in achieving the District's goals and objectives by preparing financial forecasts and models for resource and expenditure issues to ensure sound and long-term financial management.

Purchasing Agent: Under general direction from Senior Staff, the Purchasing Agent purchases or negotiates the purchase of materials, supplies, equipment and services for use by the District's divisions.

Financial Analyst: The Financial Analyst prepares and distributes the District's annual budget documents and a variety of accounting, statistical, narrative and fiscal reports. The Analyst also evaluates accounting operating systems and procedures and management policies; supervises financial and/or operational audits of District divisions and reconciles accounts.

Accounting Supervisors: The Accounting Supervisors perform a variety of accounting duties related to the maintenance and review of fiscal, financial and statistical records; and are expected to perform difficult to complex accounting work and to ensure that applicable policies and procedures are properly followed by reporting staff members.

Accounting Technicians: The Accounting Technicians work under close and continuous supervision, and perform responsible accounting clerical functions involving the maintenance of the financial or statistical records for the District's centralized accounting system and the County COMPASS system

Office Technician: The Office Technician performs a variety of typing, general office, receptionist, and related clerical tasks in support of the Finance Division's activities and operations.

HUMAN RESOURCES DIVISION

2101 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4000

The Human Resources Division is responsible for many different and varied services provided to the employees of the District. The goal of the Human Resources Division is to promote organizational effectiveness and support the professional well being of current and future employees, by recruiting and retaining exceptional individuals, facilitating fair and consistent labor relations and promoting employee development.

Under the direction of the Deputy Chief of the Human Resources Division, the staff, which includes the Deputy Chief, (1) Human Resource Analyst (1) and (2) Human Resources Technicians, is responsible for the following:

Career and Job Fairs

Promotional Examinations

Labor Relations
Recruitment and Selection
Benefits
Compensation Benchmarking
Classification Studies
Harassment Training
Grievance Processing and Resolution
Family Medical Leave Act
Military Leaves and
Temporary Personnel Services

The Human Resources Division strives to provide responsive and timely services to the various departments to achieve the selection and development of individuals who can provide the highest quality services to the community. The Division's recruitment and selection system reflects a strong commitment to equal employment opportunity principles to achieve a work force representative of the community. The Human Resources Division is committed to making the Sacramento Metropolitan Fire District a more internal customer service related organization.

HUMAN RESOURCES - CONTINUED

The Human Resources Division processed a total of 1,831 applications in 2005. The positions that were filled by the Human Resources Division in 2005 included:

- ✓ Accounting Technician
- ✓ Firefighter
- ✓ Fire Investigator
- ✓ General Counsel
- ✓ Human Resources Analyst
- ✓ Logistics Technician
- ✓ Office Technician
- ✓ Warehouse Supervisor

The recruitment process can consist of oral and/or written exercises and structured interview questions, as well as, the coordination of all phases of the interviewing and background investigations and medical clearances. A typical process for hiring would consist of:

- Announcement posting
- Collect and review applications
- Written examination
- Selection of panel interview members
- Panel oral interviews
- Paramedic assessments
- Chief's oral interviews
- Background investigations
- Notification correspondence
- Gather, update and maintain candidate status information.

In 2005, the Human Resources Division also spearheaded the promotional process for the following positions:

Battalion Chief

Fire Captain

Supervising Inspector

The promotional process includes the validation of the candidates' experience and education, which is done in conjunction with the Training Division.

The Human Resources Division is gearing up for a very busy and productive year in 2006. Some of the projects we will be working on are contract negotiations, the Engineer Promotion process and the Firefighter Academy Class.

In addition, we will be recruiting and hiring for the following positions:

- | | |
|------------------------------|--------------------------------|
| * Fleet Manager | * Assistant Fleet Manager |
| * Fleet Shop Assistant | * Equipment Service Technician |
| * Legal Secretary | * Office Technician |
| * Human Resources Analyst | * Public Affairs Officer |
| * Public Information Officer | |

COMMUNITY SERVICES

2101 Hurley Way, Sacramento, CA 92825 Phone # 916/566-4000

The Community Services Division covers a wide and varied spectrum of activities and programs to educate the public in Fire and Life Safety.

Community Services provides educational programs tailored to different age groups and public sectors from pre-school and elementary education to industrial safety training for the business community. Their goal is to foster relationships with community entities and the public by communicating the mission, goals, and the performance of the organization at community workshops, neighborhood meetings, outreach programs and other public gatherings.

Community Services also acts as the official information officer of the District by disseminating information to the membership, the media and to the public.

Pre-school and Elementary school programs are intended to educate young children to identify smoke detectors and their purpose, Stop-Drop & Roll, matches and lighters are tools – not toys, stay low in smoke, when to dial 9-1-1, and to acquaint young children with firefighters and their role as protectors.

Middle School and High School programs teach a higher level of fire and life safety, including home escape, fireworks, usage of flammable liquids, as well as, preparation for careers in the fire service.

Community Services also has programs for Senior Citizens, educating them in smoke detectors, cooking and fall hazards in the home, as well as, reduction and mitigation of home hazards.

For Businesses, there are three basic programs: Evacuation and Disaster Planning, Fire Extinguisher Training and Work Fire Safety Training. Each program's focus is adjusted to the needs of the requesting business.

Community Services also oversees the Juvenile Fire Setter Program. This program, run by the Firefighters Pacific Burn Institute, provides in-home assessments, fire safety intervention and referrals to mental health services for children who exhibit fire setting or fire play behaviors.

The Community Services Division participates in many health and safety community events during the year, including Camp Smokey, Operation River Safe, Life Jacket Exchange Programs and many other events.

One of the biggest and most popular events of the year for Community Services is Fire Camp. Eighty campers participate in a week filled with fire related activities, such as climbing an aerial ladder, learning bucket brigades, how to use a fire extinguisher and how to administer first aid. In addition, they are taught water rescue and observe an auto extrication.

In 2005, the Community Services Division participated in a large number of community events.

Program Type Breakdown	# of Programs
Community	168
PreSchool	46

Total	508

FACILITIES DIVISION

4425 Dudley Blvd, McClellan, CA 95652 Phone # 916/566-4100

The Facilities Division is staffed with five (5) authorized personnel. The Facilities Division is responsible for providing maintenance, repair and remodel services to all fifty (50) District facilities, including, but not limited to, the following activities: Asphalt and Concrete Patching or Replacement, Exterior Painting, Roof Repairs, Mechanical Systems Repair, Plumbing, Electrical, Overhead Door, Exhaust Extraction, Air Compressors, Generators, Title 24 Compliance, Flooring, Security, Fencing, etc., as well as basic to complex remodeling. After hours emergency services are also provided around the clock.

Through the monthly Facility Safety Inspection Program, each District facility is required to forward maintenance/repair issues directly to the Division. Over 1,150 requests for service are processed annually, of which the following are some examples for 2005:

- ✓ 146 exhaust extraction repair requests
- ✓ 119 electrical repair requests
- ✓ 120 overhead door repair requests
- ✓ 120 HVAC repair requests
- ✓ 172 plumbing repair requests
- ✓ 70 appliance repair requests
- ✓ 38 roofing requests
- ✓ 365 miscellaneous requests

The miscellaneous requests include all station remodels, such as:

Station 22 Kitchen
Station 27 Kitchen
Station 54 Kitchen
Station 106 B/C Quarters
Station 109 Assistant Chief Quarters

Information from these inspections is also used to develop work schedules, prioritize District wide projects and develop accurate annual Facility Budgets.

FLEET DIVISION

4425 Dudley Blvd, McClellan, CA 95652 Phone # 916/566-4100

With an authorized staff of 18 personnel, the Fleet Maintenance Division maintains a fleet in excess of 300 emergency and support vehicles. This modern facility contains 28 functional work bays. The lion's share of fleet services and repairs are performed at this facility through emergency repairs, regularly scheduled services/repairs and pump testing programs. A Mobile Repair program provides limited field repairs in an effort to reduce inconvenience and down time to emergency apparatus.

The Fleet Division has the capabilities to do:

- Routine service & safety inspections
- Complex Diagnosis & Repair
- Metal Design & Fabrication
- Design and Build Command Vehicles
- Rebuild/Repair – engines, pumps, transmissions, differentials, valves, etc.
- Paint
- Electrical Design and Repair

All vehicles in the District are scheduled to be serviced at predetermined intervals, and all District vehicles are serviced after every strike team response. The shop performs over 730 services per year.

In addition to the services above, the Fleet Division also provides Pump Testing Programs, Pre-Trip Inspection Programs and is responsible for the Fleet Master Plan and the Apparatus Specifications.

The Vehicle Replacement Master Plan projects the District's Fleet replacement needs for the next twenty years. This plan is reviewed and revised annually as each new budget is developed. Working closely with the Operations Division, apparatus specifications are developed and used to purchase apparatus that meet the mission of the District.

LOGISTICS DIVISION

3012 Gold Canal Drive, Rancho Cordova, CA 95670 Phone # 916/942-3395

The Logistics facility contains the necessary office space, repair facilities and warehouse to meet the needs of the District.

The Logistics Division has an authorized staff of 13, and in 2005 the position of Warehouse Supervisor was created.

The Logistics Division supplies District personnel with office, janitorial and EMS supplies. Additionally, the division services and repairs self-contained breathing apparatus, performs limited repairs on some emergency equipment such as chain saws, hose nozzles, performs ladder testing and extinguisher servicing and issues and repairs protective clothing. In order to manage the flow of supplies, procedures have been developed for shipping, receiving, purchasing, tracking and delivery. Support for special projects is provided upon request.

Logistics has developed specific procedures for the routine ordering of supplies. Using this process, stations and divisions can submit electronic order requests directly to the Logistics Division. An average of 168 supply requests are processed each month for a total of over 2,000 deliveries per year. Supplies are delivered to 58 locations each business day, 43 of which are fire stations. In order to accomplish this task, the District has been divided into two delivery routes, the North route and the South route. Over 50,000 miles are driven each year to provide this service.

The majority of orders entered into the system by Stations or Divisions before 7:00 a.m. will be delivered the same day.

In 2005, the Logistics Division added an oxygen generation system that is used to fill SCBA bottles.

APPARATUS & EQUIPMENT

In the year 2005, the Apparatus and Equipment team maintained all emergency equipment that is placed on all of the District apparatus. This includes purchasing, maintenance, repair, inventory management and equipment mounting. They also assist with rehab and support of training functions.

An apparatus and equipment representative also sits on all committees dealing with equipment issues. This representative reports to Operations on all activities and works as an advisor for all equipment related issues.

Apparatus and Equipment, (APEQ) also responds to emergencies to view and evaluate how the equipment functions and assist with any deficiencies or failures. They also deal with vendors and manufacturers to keep us updated with the latest in emergency equipment technology. If equipment failures occur they work to remedy the problem immediately. APEQ worked hard to support the day to day needs of the District in 2005.

During 2005, several new engines were put into service. Additionally, a new grass rig was put into service and work was performed on the new T65. APEQ also replaced all the couplings to NPSH on over 50,000 ft of 1" hose and converted nozzles and adapters for all 1" wildland hose.

APEQ repaired or replaced:

- 18 Chainsaws
- 16 Rotary saws
- 4 Smoke blowers
- 3 Floto pumps
- 12 Generators
- 12 Hurst power units
- 6 Spreaders
- 8 Cutters
- 13 Hydraulic lines
- 21 Rams
- 3 Maverick combo tools
- 169 Repairs or replacements of handlights
- Replaced all the airbags on the trucks
- Updated inventories on engines & grass units
- Serviced 185 fire extinguishers
- Replaced or repaired over 23,000 ft of hose

HEALTH and FITNESS

Metro Fire recognizes that firefighting can be a hazardous occupation and is committed to minimizing the risk to its most valuable asset: its employees. Metro Fire's Health and Fitness Program provides a wide variety of opportunities to assist the firefighter in achieving a career of health and fitness.

ROP and Fire Science Classes

Health and fitness opportunities at Metro Fire start even before a firefighter is hired. Metro Fire's high school ROP (Regional Occupation Program) students, as well as Los Rios Fire Science classes get a minimum of one visit from the District Coach covering the basics of firefighter fitness and physical capacity requirements.

CPAT

Metro Fire's Training Division, Health and Fitness Program administered a pre-offer CPAT (Candidate Physical Ability Test) on June 18th and 19th, following an initial orientation in April for all job candidates. 170 applicants were evaluated over the two-day testing period with 146 passing the evaluation and moving forward in the hiring process.

Recruit Academy

Metro Fire Recruit Class 2005-1, began their academy on February 21, 2005, with 23 recruits graduating on June 10, 2005. During their 16 weeks of instruction, the recruits participated in 62 days of physical fitness training activities. The daily duration was typically one hour, with some drills lasting up to two and a half hours.

A sampling of initial fitness scores and the percent improvement achieved during the academy revealed significant improvement in body composition, flexibility and muscular endurance. Good improvement was also realized with aerobic capacity and muscular strength.

Probationary Firefighters

Metro Fire's probationary firefighters are expected to maintain a level of physical fitness that is appropriate for the job of a firefighter. Recruit class 2004-1 and 2005-1 were assessed at regular intervals throughout 2005 to promote their compliance.

FITNESS

Metro Fire believes that being physically fit for the demanding work of a firefighter is indeed part of the job. To support this tenet, Metro Fire provides a myriad of health and fitness opportunities that are facilitated with 60 minutes of the workday being designated for physical fitness.

During 2005, Metro Firefighters logged 21,270 hours of on the job exercise/fitness training, indicating that this is, indeed, an important and valued component of a high performance Metro firefighter.

FITNESS ASSESSMENTS

The offerings of Metro Fire's Health and Fitness Program include a comprehensive annual fitness assessment. The assessment battery consists of an aerobic capacity assessment, various muscular strength and endurance assessments, an overall flexibility assessment and body composition assessments. Each participating firefighter is able to compare their values with their previous fitness assessments, compare their values with their peers and as a baseline for the design of an exercise prescription.

HEALTH AND FITNESS TRAINING PROGRAMS

Metro fire staff are supported in their pursuit of health and fitness with a monthly training drill on an important health and fitness topic. Topics for 2005 included such diverse subjects as: Nutrition for the Fire Service, Designing an Effective Aerobic Conditioning Program, Using the Stability Ball for Core Conditioning, Low Back Injury Prevention, Circuit Training, etc. These drills are presented at the fire station making it convenient for fire crews to participate.

During 2005, Metro firefighters logged 1,001 hours of personal or company health and fitness drill time with Coach Armstrong.

MONTHLY READING

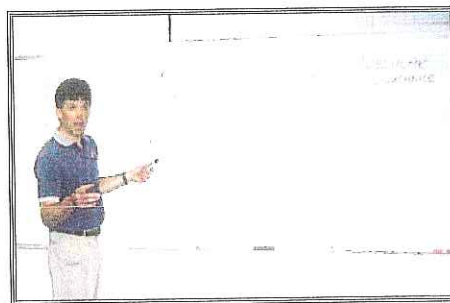

Metro Fire's Health and Fitness Program provides monthly health and fitness material for reading and study. These materials include the "Metro Fitness Flyer," a Metro Fire produced monthly publication that provides Metro Fire specific health and fitness updates, stories and ideas. Additionally, a professionally produced, multi-page newsletter titled "The Body Bulletin" is also distributed. This publication is more general in its coverage of the latest health and fitness news.

These publications, as well as additional health and fitness literature, provided for study accounted for 9,348 hours of firefighter training during 2005.

Metro Fire Health and Fitness Coordinator Program

Metro Fire began a Health and Fitness Coordinator program in 2005. This program involved recruiting nine Metro firefighters to become part of a team of Health and Fitness Coordinators. The objective of this program is to utilize the talents and energies of these firefighters to enhance the offerings available to Metro staff through the collective efforts of the team.

The nine coordinators were selected based on their previous health and fitness experience and knowledge, as well as the respect they have attained as employees of Metro Fire. During a 40-hour course of practical, didactic and personal study, the coordinators were trained in a number of topics such as basic exercise science and conditioning theory, nutrition, and injury prevention principles. Upon completion of the course, the nine firefighters were certified as Metro Fire Health and Fitness Coordinators.

Coach Armstrong teaching the importance of physically preparing for a career in the fire service to college fire science students!

PROJECT DEVELOPMENT

2005 Major Accomplishments For the Fire Station Replacement Program

The Metro Fire District's Fire Station Replacement Program kicked into high gear during 2005. In the year and a half preceding 2005, the program was focused on development of fire station plans and acquisition of real properties for new fire station sites to replace stations 32, 107, 42, 111, 29, 52 and a new station 168 in the growing community of Anatolia in the City of Rancho Cordova. During 2005, construction began on a 13,000 square foot 3-bay drive thru with 10-bed fire station to replace station 32 and a 9,200 square foot 2-bay drive thru with 8-bed fire station to replace stations 110 and 107. The combined construction cost for these first two fire stations amounts to \$8.3 million. Occupancy is scheduled for fall of 2006 for both new fire stations. Below you will see artist renderings of the new fire station designs.

Station 32 - Hazel Avenue

Station 107 – Eastern & Berrendo

VIDEO PRODUCTION

In 2005, the Video Production Department was busy with a wide variety of projects. Some of the highlights were:

- Conversion of all training materials to DVD format
- Copies of every Board Meeting to all Stations and Divisions
- Document Fire Camp 2005 and provide every camper and counselor with Photo CD and Camp DVD
- Document Recruit Class 05-1 "Pride in Performance"
- Design Graduation Invitation
- Design Graduation Take Home Color Program
- Provide each Recruit with a Photo CD and Video DVD of Recruit Academy Experience and show class video on Graduation Night to 500 attendees
- Send monthly communications and regular Fire Chief Communications videos to all stations and divisions
- Video-recorded and photographed various promotional and awards ceremonies
- Gathered all photos taken by the CA TF7 USAR Team Deployment to Hurricane Katrina and combined these files to one disc for team members
- Updated Firefighter Manipulative Performance Series used with the Academy and Probationary Firefighters to reflect changes made to the Metro Fire Hose Policy and Metro Fire SCBA Policy
- Provided video training for new PIO's in the Community Services Division
- Began work on the Truck Company Evolutions Video Series, which will include such topics as vehicle extrication, securing utilities, salvage and overhaul, ventilation, attic scuttle, etc.

In addition, Metro was the recipient of the Communicator's "Award to Distinguishment" for the Video entitled "Safetyville USA," a Video tour of Safetyville USA, the little city.

Metro Fire was also the recipient of the Communicator's "Honorable Mention" for the Video entitled "Rick Martinez: A Life in the Fire Service," a look at the career of Retired Fire Chief Rick Martinez.

FIRE CADET PROGRAM

The Sacramento Metropolitan Fire District's Cadet Program is designed to provide training and experience to young adults between the ages of 18 and 25 with the knowledge and skills of basic firefighting, emergency medical and rescue functions. During the program, Fire Cadets will be provided with academic and manipulative instruction that encompasses a wide range of subjects.

The Fire Cadet Program ("Program") is divided into three (3) levels containing modules of structured training and instructions mirroring the Metro Fire's Recruit Firefighter Academy:

Fire Cadet Level I

Fire Cadets will attend class instructions at approximately eight (8) hours a week. It is during this phase that the Fire Cadets are exposed to both the cognitive and manipulative skills related aspects of Fire Technology, Technical Rescue, and Emergency Medical Services skills. The Fire Cadets are learning the basics of firefighting. This module is approximately four (4) months.

Fire Cadet Level II

Fire Cadets will attend intermediate classroom instructions and will be able to apply the manipulative skills they have learned. It is during this phase that the Fire Cadets will have the opportunity for hands-on training and is geared towards reinforcing the knowledge learned.

Fire Cadet Level III

Fire Cadet Level III is considered the advanced module where it is geared towards meeting Metro Fire's Firefighter minimum qualification requirements. Fire Cadets will complete the formal training to earn Firefighter I and Emergency Medical Technician (EMT) Certification, as well as physical training and familiarization with Metro Fire's Department structure policies and practices.

In order to remain in the Fire Cadet Program, individuals must successfully complete all District sponsored curriculum and pass all required courses.

Since 1994, the Fire Cadet Program has assisted forty-eight (48) former Cadets hired as Firefighters in various fire agencies, seven (7) of which were hired at Metro Fire, four (4) with Folsom Fire, three (3) with Roseville Fire, two (2) with Sacramento Fire Department, and two (2) with South Placer Fire District. In the year 2002, the Fire Cadets participated in 106 events, totaling 807 hours of community service hours.

METRO FIRE RECRUIT ACADEMY – 2005

Goals of the Academy

- Provide Recruits with a sound academic foundation in the most current and approved fire fighting practices
- Instruct Recruits to safely and effectively perform Firefighter I manipulative skills in progressive, realistic, foreground-paced training
- Hold Recruits to the highest standard of conduct and require them to consistently represent this standard to the public and to their peers
- Prepare Recruits for an organizational culture that emphasizes teamwork, professionalism, personal accountability, and respect for the chain of command within the framework of a paramilitary organization
- Ensure Recruits have the level of fitness required to effectively perform all tasks required of firefighters and to develop habits that promote health and fitness throughout their careers
- Impart Recruits with an appreciation of, and their responsibility to, the history, tradition and legacy of the fire service
- Develop Recruits to be potential fire service leaders by teaching them to be good followers first, then increasing their levels of responsibility

Recruit Class 05-1

Facts:

- Twenty-four Recruits successfully graduated a sixteen-week academy on June 10, 2005 in a ceremony at McClellan Park Theater. This is the last date that all twenty-four recruits would ever be assigned together; for the rest of their careers one-third of them will be on-duty on a given day.

- Recruits were trained in California State Firefighter I standards including fire science, building construction, hand and power tool management, fire hose evolutions, ladder operations, self-contained breathing apparatus use, ropes & knots, and wildland fire suppression.
- Specialty training was provided in hazardous materials, swift water rescue, confined space rescue, incident command system and aircraft fire/rescue operations.
- All recruits had to maintain an academic level greater than 75% on all written evaluations.
- Recruits logged over 3,800 jogged miles, nearly 40,000 push-ups and sit-ups, lifted over 15 tons (not including the weight of ladders during drills), and ran up 2,000 stories (in the training towers) in the course of the Academy.
- Drill Instructors logged 5,584 hours training for the Academy. Adjunct instructors were brought in to teach over 400 hours of specialty classes.
- Class 05-1 included four Paramedics and five EMTs. Fifteen recruits had completed the District's Paramedic Intern program before entering the Academy. All Paramedics meet National Registry qualifications.
- During weekly inspections the Recruits are held to over twenty-five standards ranging from personal grooming to uniform and equipment conditions. Most of this "Attention to Detail" (an Academy motto) is done during the Recruits off-duty time, attesting that this is a career that is also a lifestyle.
- Sacramento Metro Fire continues to attract candidates and firefighters from all over California and the western states.

RESERVE PROGRAM

The Reserve Program functions under the Operations Division and operates as an auxiliary suppression force in the Battalion 5 areas of Rio Linda and Elverta. Metro Fire has budgeted for twenty (20) Reserves, and currently have nine (9) working for the District.

The Reserves maintain two (2) Reserve fire stations, Station 112 and Station 116 and staff the engine, grass and water tender apparatus on a 'paid call' basis. Their primary responsibility is to provide a water supply to the un-watered areas of Battalion 5. The Reserves can be counted on to aid in any fire suppression needs to augment the paid companies in the Battalion. They can also be called up through the Incident Commander to respond to many other incident types as needed.

The Reserves train on a regularly scheduled basis to keep abreast of the constant changes in the fire service. The Drills cover topics such as:

- Ladders
- Hose and Suppression Tactics
- Breathing apparatus
- Tools and Equipment
- Search and Rescue
- Survival and Safety
- Wildland Firefighting
- EMS
- Fitness & Injury Prevention

Another very important function of the Reserves is participation in community service events. Each year the Reserves provide EMS standby at area sporting events such as the Cherry Island Soccer complex and the "World Championship" wakeboard competition at Bell Aqua Ski Lakes. They do the same for the annual Demolition Derby fundraiser and an always exciting event, the Championship Bull Riding school at the Central Park Rodeo Grounds.

There are also many static display events where the Reserves staff a booth to provide fire safety information and demonstrations. The "North Highlands Community Days" and the annual "Tractor and Farm Days," the Little League Parade and Veterans Day Parade, just to name a few.

ROP PROGRAM

The ROP program is a JPA (Joint Powers Act) agreement with Sacramento County Office of Education (SCOE), California Professional Firefighters Joint Apprenticeship Committee (CPFJAC) and Metro Fire.

OBJECTIVE

The objective of the ROP program is to provide students with an opportunity to explore careers and career preparation for the fire service, to provide instruction in basic firefighting skills that will prepare students for entry-level fire service positions in CDF, USFS and local fire agencies, and to give students the opportunity to apply learned skills and experience the work environment and expectations of a firefighter.

CLASSES

Classes are held Monday through Friday at two locations. The north class is held at Station 21 and the south class is held at Station 52 on Elder Creek Road. There are a total of 50 students, 25 at each site.

The instructors are Credentialed/Professional firefighters that work in different capacities for Sacramento Metro Fire, Sacramento Fire and Galt Fire.

FIRST SEMESTER

The first semester is 5 months long and covers such topics as Fire Hose & Appliances, Ground Ladders, Forcible Entry, Rescue, Ventilation, Fire Streams and Nozzles, Vehicle Extrications, etc. Students are graded on testing, homework, quizzes and attendance. Students achieving 90% on overall quiz and test scores and whose attendance falls within guidelines, are allowed to continue to the second semester. Each semester consists of 270 hours of training.

SECOND SEMESTER

The second semester begins in February and ends the first week of June. Students participate in a 16 week Ride Along Program at the fire stations. The grading for the second semester is based on attendance, weekly assignments, company input and instructor input. The second semester covers such topics as ICS 100/200, Wildland/I-Zone Firefighting, Swift Water Awareness, Hazardous Materials, First Responder Operational and WMD, Firefighter I Skills Review and Resting, Facilities Tours and Application Resume Preparation.

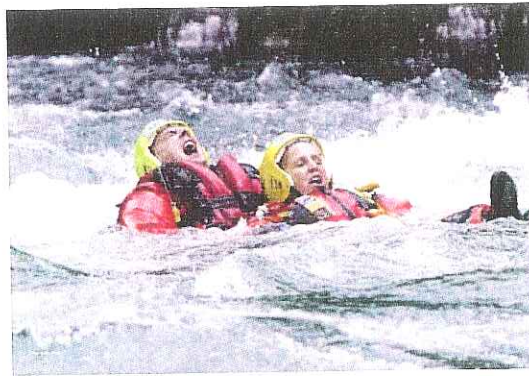

TRAINING DIVISION

4427 Dudley Blvd, McClellan, CA 95652 Phone # 916/566-4400

The Metro Fire Training/Safety Division is staffed by 14 full-time employees. Six suppression Captains working with an Analyst, Video Technician, Office Technician, Secretary and the Health & Fitness Coordinator work to develop and implement the training programs needed to provide for safe efficient operations of our line personnel.

In 2005, a variety of training programs were delivered either as recurrent or new programs. A sampling is listed below:

- SCBA Fit Testing
- Fitness Assessments and Health and Fitness Education
- Confined Space and Ropes classes
- Hazardous Materials and Decontamination classes
- Air Crash Rescue classes and ARFF recurrent training
- Swift Water and Boat Operator classes
- Wildland training and JPA Wildland classes
- Captains and Battalion Chiefs Academies
- Multi-company Readiness Exercises

This training is in addition to the regular monthly training plan encompassing basic fire and EMS skills. Metro Fire Training is also involved with other outside agencies in programs such as:

- Urban Search & Rescue
- Sacramento Valley Training Officers Association
- Canine Training
- Fire & Rescue and Public Safety JPA's

In 2006 the Training Division will be coordinating the planning and construction of phase one of the Fire & Rescue training site at McClellan Park. This is an approximate three million dollar improvement project.

SAFETY DIVISION

4427 Dudley Blvd, McClellan, CA 95652 Phone # 916/566-4400

The Safety Division had another busy and productive year in 2005. One of the developments that required coordination and training, was the acquisition of the new Scott SCBA with all of the training and FIT testing that accompanies such a transition. In addition to the implementation of the new Scott breathing apparatus, the Safety Division concentrated on the following:

- Over 3,926 quantitative fit tests on respiratory masks
- Fit testing assistance for allied agencies such as the Sheriff's Department
- Over 5,400 Advanced Protective clothing inspections on structural and wildland protective clothing
- Coordination of the immunization program
- Conducting fireground safety officer class for members of the Training Division
- Development of specialized respiratory training for the Fire Prevention Division
- Implemented a sun exposure program that included sunscreen and sun hats
- Maintenance and expansion of the thermal imaging camera program
- Developed with the Training Division the Live Fire Training Program

In addition to the above, the Safety Division conducts monthly joint Labor/Management Safety Committee meetings, provides tickler topics in the Tailboard Safety Program, maintained and updated many of the safety related policies and procedures and conducted lectures for the Academy on safety related topics.

The Safety Division is also responsible for the distribution and maintenance of all personal protective clothing, equipment and safety footwear.

EMS DIVISION

2101 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4000

The Sacramento Metropolitan Fire District currently deploys twelve 24-hour Advanced Life Support (ALS) ambulances, a number of ALS reserve ambulances, and several ALS engine companies. The District also deploys two peak time ALS ambulances to augment the EMS system during busier times. The District will continue to add ALS ambulances as the need arises.

The District maintains an AED (Automatic External Defibrillator) throughout the District. With the AED, all engine and truck companies have the ability to "shock" the heart of certain cardiac patients back into a life sustaining rhythm until ALS units arrive.

The Sacramento Metropolitan Fire District hires firefighters and trains them to be paramedics in a joint effort with American River College's program, which provides the unique opportunity for new employees to train as Paramedics while working as probationary firefighters. The district also provides opportunities for established line personnel to become paramedics. Non-affiliated paramedic students can be provided a field internship on a District ALS ambulance to complete their training.

The Sacramento Metropolitan Fire District provides a ride along program. This program allows members of the public or other medical professionals to receive first-hand experience and observe what firefighters do as part of their daily routine around the fire station and on emergency incidents.

Our Continuous Quality Improvement (CQI) is comprised of EMT-Paramedics who read and review each paramedic run report written within the District. The reports are reviewed for protocol compliance, appropriate treatment, and thoroughness. The program is peer-based and serves to assure the highest standards possible are being delivered to the public we serve.

OPERATIONS DIVISION

2101 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4000

The Operations Division provides a multitude of emergency and non-emergency services to the public. More than 500 firefighters working out of 42 stations are directly responsible to mitigate a wide variety of emergency incidents 24/7.

In 2005, the combined District responded to over 86,000 alarms. The District operates 10 transporting Advanced Life Support medics, 7 reserve transporting medics, 38 engine companies, 5 truck companies, 24 grass engines, 2 crash rescue rigs, 6 water tenders, 4 swift water rescue bikes, 5 swift water rescue inflatable rubber boats, 5 air units, 3 reserve firefighter engine companies, 2 reserve firefighter grass engines and a helicopter. Many of the District's engines are paramedic staffed and all responding units provide EMT coverage.

In addition to emergency medical alarms and structural or wildland fire responses, the District's personnel are trained and equipped to deal with swift water emergencies, confined space incidents, technical rescues, hazardous materials incidents and crash fire rescue. In the 2005, wildland fire season the District sent engine companies to Arizona, Wyoming and Nevada to battle record size fires. Some of the District's personnel are trained and experienced as overhead team staff and served on major complex fires in neighboring states.

Photograph by B/C Jim Eastman

Additionally, many of our members hold critical roles on the Urban Search and Rescue Task Force 7 Team. This team responds to large scale disasters, both natural and manmade.

SPECIAL OPERATIONS

2101 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4000

Emergency Planning and Special Operations (EPSO) is home to the Aviation Unit, Hazardous Materials Response Team, Homeland Security and Technical Rescue provided by R21.

2005 was an exceptionally busy year for all of us in EPSO.

HAZARDOUS MATERIALS

Began the upgrade process to type 1 status. This primarily involves improvements in Hazardous Materials detection and identification capabilities and an increase in recognition and mitigation capabilities for Weapons of Mass Destruction. This upgrade will be completed in late 2006.

AVIATION

In addition to an extremely busy fire season, the crew concentrated on expanding their capabilities in water rescue. This effort culminated in a dramatic rescue from a vehicle washed off of the roadway into a flooded creek on December 31, 2005, which was televised live.

HOMELAND SECURITY

Numerous projects in Infrastructure Buffer Zone Protection Planning and Training & Exercise have kept our employees busy in the Sacramento Regional Office of Homeland Security. Additionally, their office is tasked every time that high profile events and dignitaries visit the region.

RESCUE

Rescue 21 has had their hands full this year keeping their confined space skills current while developing policies on Trench Rescue and initiating a contract with the Western Power Authority for high angle rescue training. Naturally this high profile rig is called for "Special Duty" on a regular basis showing their wares to everyone from dignitaries to schoolchildren.

HAZMAT

2101 Hurley Way, Sacramento, CA 95825 Phone # 916/566-4000

The Sacramento Metropolitan Fire District Hazardous Materials Response Team, (Metro Fire HMRT), was established in 2003 to provide an organized, integrated and effective response to hazardous materials incidents. The HMRT provides coordination and technical services to ensure the safety of the community and protect the environment and property in response to hazardous materials releases.

The Metro Fire HMRT provides recommendations and assistance in the areas of isolation, notification, identification, hazard assessment, protective actions, containment, and mitigation. Additionally Metro Fire HMRT provides technical and reference material support for proper handling and cleanup recommendations upon request to assist in such actions. The HMRT carries out these specific functions as follows:

1. Provide advice to the Incident Commander regarding scene management and coordination of resources.
2. Notify appropriate emergency response and regulatory agencies, ensuring that the Sacramento Regional Fire Emergency Communications Center, (SRFECC), has been notified that a Level II HAZMAT Incident has occurred.
3. Provide site assessment, including identification of hazardous materials and the evaluation of the possible hazards.
4. Implement safety measures to protect emergency responders and the public at the scene.
5. Implement safe containment and control actions.
6. Assure hazardous waste site cleanup operations have been transferred to an appropriately trained and certified hazardous waste contractor.

C.I.S.M. (Critical Incident Stress Management)

Critical Incident Stress Management is crucial to the longevity and health of our employees. The ability to deal with stress, whether on the job or off is important in order to have a long and fruitful career in the Fire Service. CISM is just one tool that the employees of Sacramento Metropolitan Fire District have available to them. We all see the catastrophic effects that come when stress is not dealt with in a positive manner. CISM provides simple, yet practical tools to enable the employee to cope with stress and the effects that come with it. These services are available to all SMFD personnel/family as well as the business community.

The Sacramento Metropolitan Fire District Critical Incident Response Team is currently comprised of 17 members. They range in rank from Captain to Firefighter/Paramedic. The SMFD CISM Team is the largest and most often requested team in the greater Sacramento area. The SMFD CISM Team is part of a larger organization called the NORCAL CISM. The NORCAL Team is a mix of Fire peers, Police peers, EMS personnel, Hospital Staff Nurses, Mental Health professionals and Chaplains, both Fire and Police. They provide additional response teams to the Greater Northern California jurisdiction.

In addition to the NORCAL Team the SMFD CISM Team is also registered with the International Critical Incident Stress Foundation in Baltimore, Maryland. The ICISF provides additional training and resources throughout the world. They have a 24-hour hotline that provides teams based on their location and specialty arena.

The SMFD CISM Team received requests and responded to numerous agencies during the 2005 year. Some of these included, Sacramento City Fire Department, Elk Grove Fire District, City of Folsom Fire Department, Roseville City Fire Department, United States Forest Service, American Medical Response and Fire Dispatch. The SMFD CISM Team also responded to several local businesses upon their request.

Due to the extreme confidential nature of defusings and debriefings, the SMFD CISM Team is often busily working behind the scenes, unnoticed. The SMFD CISM Team responded to approximately 25-30 requests for service during the 2005 calendar year. These ranged from simple one-on-one peer interventions to full debriefings/defusings.

The SMFD CISM Team provides excellent information on how to recognize signs and symptoms of stress and gives coping strategies to our employees. These topics are covered during a basic debriefing/defusing and given to the participants in the form of handouts.

CHAPLAINCY

4425 Dudley Blvd, McClellan, CA 95652 Phone # 916/566-4100

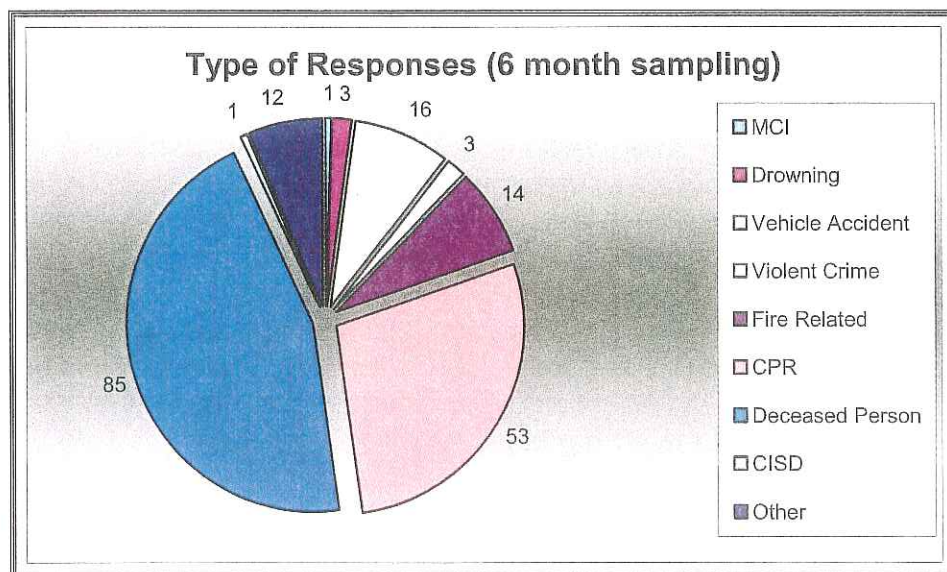

Fire Chaplains respond to the following needs:

- Provide for the Spiritual needs of fire personnel and their families and requested
- Crisis situations involving fire personnel and the families of fire personnel
- Visiting fire personnel that are sick or injured at home or in the hospital
- Crisis intervention involving victims of emergencies that require fire response
- Assist fire personnel with stress management
- Crisis intervention involving fire personnel who seek family guidance
- Serve as a part of the CISM (Critical Incident Stress Management) process
- Assist the IC (Incident Commander) at an emergency as directed
- Serve as a liaison with local clergy and benevolent organizations
- Perform or participate in wedding ceremonies, funerals, dedications and baptisms for fire personnel and their families. Conduct funeral services for families that have no one spiritual affiliation
- Provide a listening ear and keep what is heard confidential

The Sacramento Area Fire Chaplaincy is supported by the generosity of the fire personnel it serves. Area fire districts support the Chaplaincy and one district matches the giving of their firefighters annually. There are several private donations annually from other groups as well. The Chaplaincy is deeply grateful to all those who support us in serving the fire service in the Sacramento area.

At present there is one full time paid Fire Chaplain and twelve Associate Fire Chaplains who are non-paid volunteers. Eight Associates are firefighters, two are retired firefighters and two have worked in fire related fields.

The Chaplains are available to respond 24 hours a day, 7 days a week. The Senior Chaplain acts as call-out dispatcher for the Associate Chaplains.

LOCAL 522

Local 522 provides representation to all members of our labor group with regards to our wages, benefits, and working conditions. In addition to working to ensure that our members are represented appropriately, 522 tries to make a difference in the quality of people who work here at Metro Fire. 522 strives to ensure that the organization employs people who will make it their priority to uphold and exceed the expectations set forth. They strive to obtain a working wage that not only attracts top quality candidates, but a wage that will support and secure employee's loyalty to the organization. Our wage and benefit package has proven that our organization remains extremely competitive with other comparable jurisdictions.

In addition to the Professional Firefighters, we also represent many other imperative employees within the organization. These professionals include, Mechanics, Craftsman, Investigators, Fire Prevention personnel, PIO's and Public Education Techs. We enjoy the benefits of our ASP group personnel as well. Local 522 represents a significant number of employees who all work together to ensure that we fulfill our organization's mission.

Our 522 members are not the only ones that benefit from this relationship. The citizens of the community are the recipients of the attention and care that our professional personnel exhibit.

We now have the ability to form committees comprised of members from both labor and management that provide direction for many facets of the organization. The following are a few examples of what has been accomplished:

- | | |
|------------------------|-----------------------------------|
| 1. Apparatus Committee | 6. CJAC Committee |
| 2. SCBA Committee | 7. Station and Facility Committee |
| 3. Turnout Committee | 8. Promotional Committee |
| 4. Uniform Committee | 9. 48/96 Committee |
| 5. Truck Committee | |

Other items of interest that were accomplished in 2005 are:

1. Obtained our "Firefighters Bill of Rights" document
2. Supported the additional Medic Companies
3. Supported re-visiting the Station Replacement Master Plan
4. Assist with securing future financial opportunities from the cities whose boundary lines reside within our jurisdiction
5. Support the addition of new Truck and Engine Companies
6. Supported completing the goal of maintaining a fourth firefighter to all truck companies
7. We supported the assignment of a second truck company to every confirmed working structure
8. We supported the encouragement of BC's to utilizing R21

TEAMSTERS LOCAL #228

On December 1, 2000, the two largest fire protection districts in the Sacramento County area reorganized to form the largest single fire protection district in the County of Sacramento and the seventh largest local fire agency in the State of California. As a result of this historic merger, the American River and Sacramento County Battalion Chiefs Bargaining Units joined to form the Battalion Chiefs Organization of the Sacramento Metropolitan Fire District affiliated with The International Brotherhood of Teamsters Local #228.

The Battalion Chief's Organization represents the professional interests of the Battalion Chiefs who are middle managers within the fire organization. This diverse group of employees is made up of personnel from all of the predecessor districts coming together with a wide variety of skills and a combination of formal and highly specialized education. Each Battalion Chief is responsible for the administration of their respective battalion, all of the apparatus and equipment assigned to that battalion and the staffing of the personnel providing the essential services to the community we've sworn to protect and the services our citizens have come to rely upon.

The relationship between the Fire District and the Union improved greatly during the last quarter of 2005 showing great promise as the ability to communicate effectually and in a more progressive and cooperative management/labor environment was created. This newly formed "interest-based" attitude will contribute greatly to the successful resolution of the challenges facing both the Sacramento Metropolitan Fire District and the Battalion Chiefs Organization.

ASP/522

Administrative Support Personnel, or ASP, was formed in December 2000 when Sacramento County Fire and American River Fire Districts merged. In December 2003, ASP became an affiliate of Sacramento Area Firefighters Local 522. ASP/522 currently represents approximately 35 support employees that include Office Technicians, Accounting Technicians, Facilities Technicians and Assistants, Logistics Technicians and a Video Technician. ASP/522 serves for "protection and advancements of the interest and general welfare of Support Personnel."

FIRE PREVENTION BUREAU

3012 Gold Canal Drive, Rancho Cordova, CA 95670 Phone # 916/942-3400

Fire Investigations

The Fire Investigation Division is responsible for investigating fires to determine cause and origin. As Peace Officers, Fire Investigators conduct criminal investigations and prosecution of arsonists. Fire Investigators also assist the Community Services Division with the department's Juvenile Fire-Setters Program.

To contact the Fire Investigators call (916) 566-4000 or you can call the arson hotline at 1-888-322-7766.

What is a Fire Investigation?

An investigation is conducted to determine the origin, cause, and other factors that may have contributed to the ignition and growth of a fire.

Fire investigators conduct a fire investigation to compile data and analyze the information related to fires and explosions.

Investigation data is used to:

- *Reduce loss of life and property*
- *Determine if a fire was intentionally set*
- *Provide a basis of fact for after-fire legal processes*
- *Identify trends*

What is the Investigator's Job? The Systematic Approach

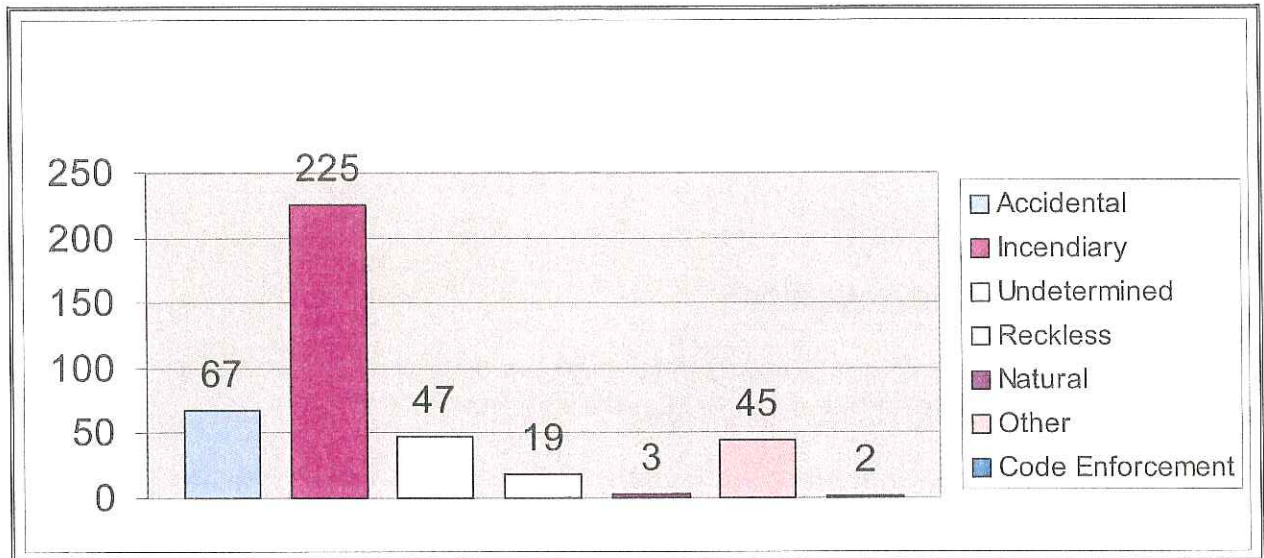

The investigator's job is to determine the origin and cause of a fire after ruling out all possibilities of how and where the fire started. A systematic approach is used in processing every fire scene. An Investigator is on call 24-hours per day, 365 days a year. The response criteria for an Investigator includes:

- | | |
|---|--------------------------------------|
| * Arson fires | * Total loss fires |
| * Suspicious fires | * Fires in institutional occupancies |
| * Undetermined causes | * Fires in educational occupancies |
| * Fatalities | * Fire Injuries |
| * As deemed necessary by the Incident Commander | |

FIRE PREVENTION

Mapping Division

The Mapping Division of the Fire Prevention Bureau maintains and updates district maps and distribution. Mapping is located at the Fire Prevention Building located at 3012 Gold Canal Drive in Rancho Cordova, CA. In 2005, the Mapping Division adopted additional methods of data collection and quality crosscheck for district maps. Additionally, the Mapping Division provided feedback to the County's Regional Mapping Cooperative.

The Mapping Division is currently staffed by two employees.

2005 saw continued expanded use of ESRI Arcview GIS from AutoCAD map.

Mapping assumed responsibility for Station Performance and Location Planning maps using Deccan Software and completed numerous special request mapping projects for both internal and external customers, including:

- ❑ Water District map updates
- ❑ Various Board Division maps
- ❑ Updated Fire Prevention Bureau diagrams
- ❑ Advanced District's prefire plan system
- ❑ Wild Land Parkway Map Book
- ❑ Hospital Maps
- ❑ Battalion Chief Maps with aerial background
- ❑ Color maps for SRA
- ❑ Economic Development maps
- ❑ Multi-Jurisdictional maps
- ❑ MDT mapping setup with Radio data 911
- ❑ Maps for ISO
- ❑ Station location maps for construction
- ❑ American River Parkway maps

METRO FIREFIGHTERS ASSOCIATION

Metro Firefighters Association was formed in 2000. The organization was united from all the predecessor agencies. The mission of the organization is social and charity driven. We have four board members who oversee the operations, and every member has the right to be involved in decisions. We host ten large family oriented events each year. Our firefighter children have a great time at the Easter Egg Hunt, Halloween Costume Party and Christmas Party. Other events include Ski Days, Shift Campouts, Battle of the Battalions Golf Tournament, and the 4 Wheel Drive Trip. We are on our 3rd year of a large picnic, called the 9/11 Picnic and Music in the Park. This has the largest attendance of any event (600+ last year). We have a number of talented people in our fire family who perform on stage at this event. The Metro Firefighters Association hosts the annual retirement party for all personnel who retired the previous year. This is an opportunity for the Association, the Fire District and the Union to disperse gifts for years of service.

The Association donates a quarter of its annual budget to local charities, including the Firefighters Burn Center and Shriner's Hospital, Burn Camp and Fire Camp, the Sacramento Food Bank and the Children's Receiving Home. Recently we added the Keaton Raphael Memorial Fund to our list. We operate under a guideline to assure that the money stays within our community and is usually health oriented.

The annual budget comes from employee donations of \$5 a month. It fluctuates due to hiring and retiring, but it is usually about \$33K. We strive for 100% membership, and this year we are about 80%. We have one large fundraiser, The Dean Baker Memorial Crab Feed, which is held every year. Every even year the Crab Feed Proceeds go into the operating budget, increasing the above amount by the profit. Every odd year the Crab Feed proceeds are deposited directly into the Widow and Orphan Fund. We raise between 15-20K for this event.

A benefit to every employee, member or not, is the recently established Widow and Orphan Fund (also known as the Voluntary Employee Benefit Association). Each Association Member benefits significantly more than the non-member; however, each employee who has a death in their immediate family will be contacted by a representative within 24 hours of notification and dollars and/or donations are available for their immediate use. The money in the fund is by voluntary employee donation and small donations annually from the public. As stated above, the Crab Feed is the only guaranteed fundraiser every odd year.

SACRAMENTO FIRE BUFF CLUB & CANTEEN SERVICE

P. O. Box 13862 Sacramento, CA 95653 Phone # 916/332-3067 www.sacramentofirebuffclub.org

The purpose of the Sacramento Fire Buff Club is to preserve the history, apparatus and paraphernalia of the fire service in California. To promote fellowship among firefighters (past and present) and their families and those others who are interested in the fire service. To give something back to the community through its canteen service.

We were incorporated in the State of California on May 4, 1982, and are recognized by the IRS as a 501(c)3 non-profit corporation. We are open to anyone interested in the fire service.

The Sacramento Fire Buff Club canteen service was created in 1994 when the club members decided to give something back to the community by finding a way to assist the firefighters of the Sacramento County Fire Protection District. It was originally funded with money from the club, plus a donation of \$1,500 from the Sacramento County Fire Protection District. The canteen service is presently funded by a \$2,000 per year retainer from Metro Fire. The canteen also receives financial support by way of payroll deduction from Metro Employees.

The Canteen service consists of two units. The north unit is a former Metro medic unit housed at Station 112. The south unit is a Chevrolet Astrovan housed at Station 62. Each unit tows a porta-potty.

The idea for the porta-potties was derived from the ones used by CalTrans road cleanup crews. We received a donation from the firefighter's association for \$1,200 and bought a new porta-potty. We already had the trailer, so the match was made. The second unit was built from a porta-potty donated by Folsom Lake State Park when they replaced a number of their facilities.

We are automatically dispatched on second alarm responses and on Level 2 Hazmat incidents. We can also respond anywhere in the region with the approval of the Sacramento Metro Fire District Duty Chief. We have assisted DART in Yolo County and have gone into Placer County on grass fires.

The SFBC canteen committee takes care of the maintenance of the vehicles, fuel, insurance and license for the porta-potties, (both canteen vehicles are exempt plated). Metro Fire provides the bottled water, bottled Gatorade and Power Bars.

In the calendar year of 2005, the canteens responded on sixty (60) events. This number included the wildland interface drills at Mather Airpark and other large drills.

Station 52 was constructed in 1965 for the Florin Fire District and is located at 9780 Elder Creek Road. In addition to the fire station, this site originally housed the District's drill tower, drafting pit and the training division. The facility is currently closed. The station is currently assigned to the Regional Occupational Program (ROP).
